

# Harrison's Woodland

Image: Harrison's Wood

## About the wood...

This is our 2011-13 Supporter Woodland, covering an area of 6.3 hectares. A mixture of native broadleaf species have been planted, including large proportions Hawthorn (15%), Oak (16%), Ash (16%) and Downy Birch (10%), along with Alder, Rowan, Holly, Bird Cherry and Blackthorn. In total 6750 trees have been planted on the site.

It adjoins an area of woodland that YDMT planted in 2009 called Parlour Barn Wood, and it also links to hedgerows and other smaller areas of native broadleaf woodland in the area, allowing insects, animals, wildflowers, lichens and other wildlife to move between the woodland areas and thrive.

## How to get there...

From A59 Eastbound (Skipton - Harrogate). At Fewston Reservoir (just after the church on your right) turn left onto Hardisty Hill, signposted Pateley Bridge. Continue past the Stone House Inn, and after approximately 1 mile turn right onto Braithwaite Lane and continue to the T junction. The track leading to the woodland is directly opposite, signposted Parlour Barn Kennels and Cattery.

### From Greenhow.

Opposite the church turn onto Duck Street Lane, signposted Blubberhouses/Harrogate. Continue for 3 miles. Turn left onto Braithwaite Lane, continue to T-junction. Take the track opposite signposted Parlour Barn Kennels and Cattery.

**The Yorkshire Dales Millennium Trust** is a small charity doing big things to support every aspect of life in the Yorkshire Dales. By supporting our work you have helped to restore part of the wonderful jigsaw of features which makes the Yorkshire Dales landscape so special.

**Thank you.**

### Access:

The woodland is situated on private land and is not open to the public (except on official YDMT woodland open days). There is perimeter access around the site via public footpaths which provide a good view of the woodland.

We're passionate about restoring woodlands in the Yorkshire Dales. With your help we've planted over 1 million new native broadleaf trees so far, creating hundreds of natural woodlands which will absorb carbon, create vibrant wildlife habitats and enrich the landscape for people to enjoy.

Thank you for your vital support.
